ESTD. 2001. AUTONOMOUS INSTITUTE

BLOCKCHAIN-BASED CROWDFUNDING PLATFORM

SUBJECT: BLOCK-CHAIN TECHNOLOGY
SUB-CODE: BCS613A
SEMESTER: 6th
SECTION: BHASKARA

PRESENTED BY: KOUSTAV DUTTA (1VE23CS082)
MAYANK SINGH (1VE23CS100)
MOHIT PAL (1VE23CS106)
NEELOTPAL GHOSH(1VE23CS114)

INTRODUCTION & PROBLEM

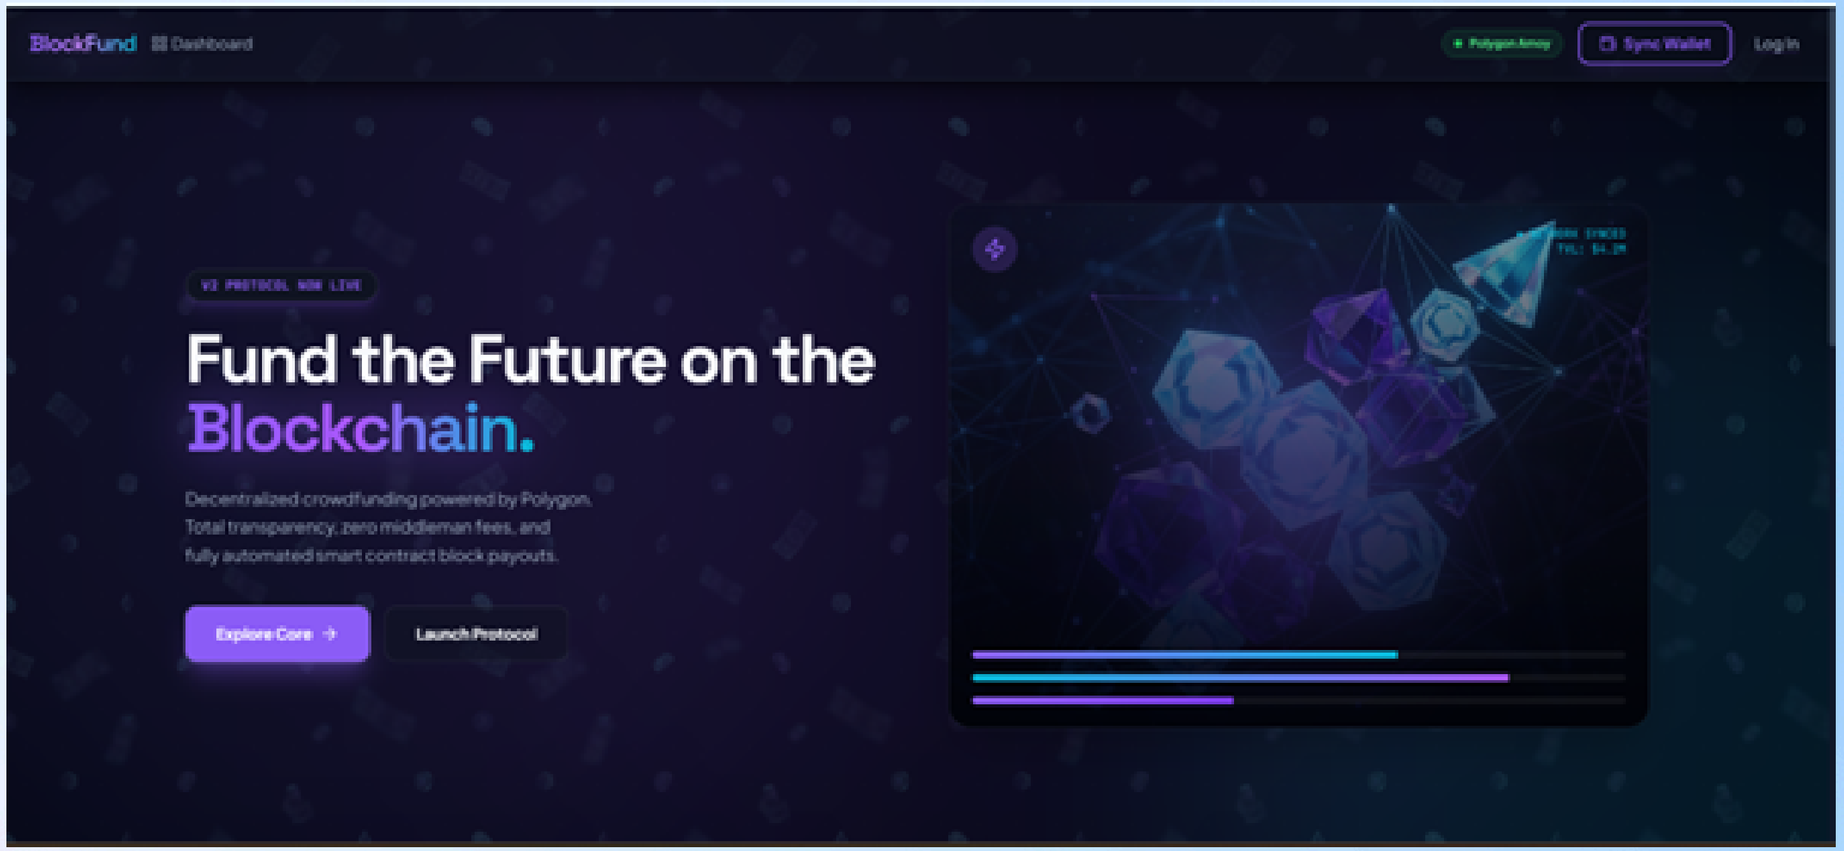

- Crowdfunding is widely used for startups, social causes, and innovation
- Traditional platforms (centralized) suffer from:
  - Lack of transparency in fund usage
  - Risk of fraud and fake campaigns
  - High platform fees and control by intermediaries
- Users cannot verify how funds are actually used

Problem: Trust and transparency are missing

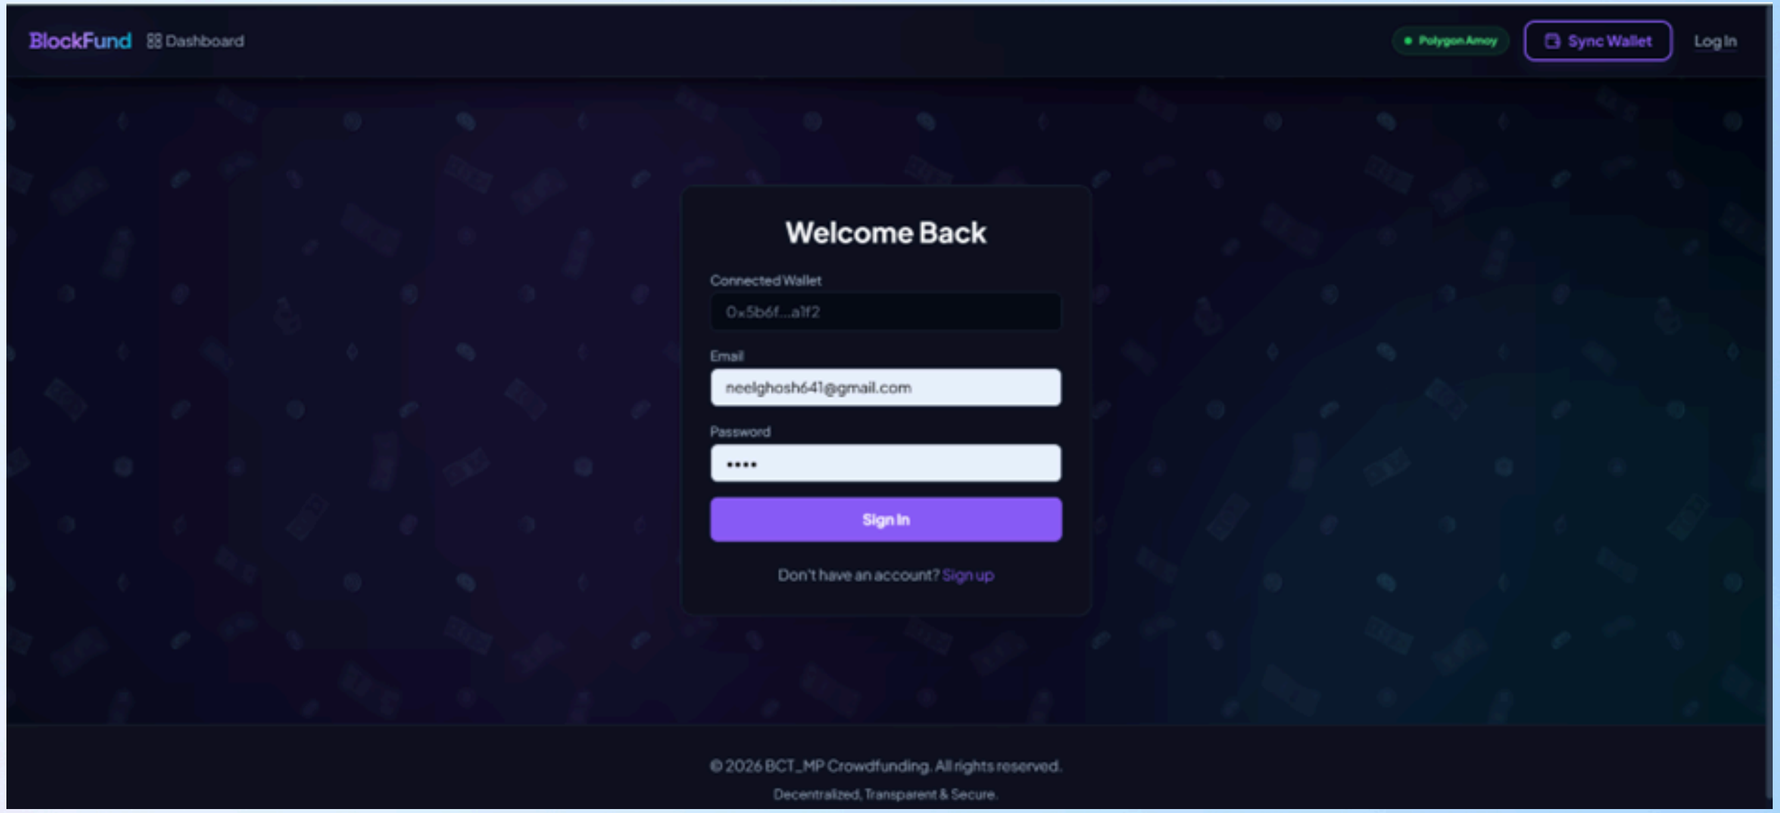

PROPOSED SOLUTION

- BlockFund uses blockchain technology to solve these issues
- Smart contracts ensure:
- Funds are locked securely
- Rules are enforced automatically
- Every transaction is:
- Transparent
- Immutable (cannot be changed)
- No need for third-party control

ADVANTAGES & USE CASES

Advantages:

- Eliminates intermediaries
- High security and data integrity
- Transparent and tamper-proof
- Global accessibility
- Trustless environment

Use Cases:

- Startup fundraising
- Charity and donations
- Disaster relief funding
- Community-driven projects

CONCLUSION

- BlockFund leverages blockchain to improve crowdfunding
- Smart contracts ensure fairness and automation
- Provides a transparent and secure funding ecosystem

Future Scope:

- Mobile application
- Multi-chain integration
- AI-based fraud detection

2nd May, 2030

THANK YOU
